18 CME CREDITS

The International Society for Urban Health (ISUH) facilitates the exchange of perspectives, research methods, and data on the study of disease in urban areas and the effects of urbanization on health. Membership is open to anyone interested in the health of urban populations.

Annual Membership costs $150 ($100 for students and NYAM fellows) and includes a subscription to the Journal of Urban Health, which is published quarterly. You can become a member by visiting our website at www.isuh.org.

Conference Registration

ISUH Member $200
Non-Member $250
Student or NYAM Staff $50

You can register by mail or via the ISUH website: www.isuh.org

Three quarters of the world's population will live in cities by the middle of the 21st century. With increased globalization and migration, and changing economic policies, understanding the health of urban populations becomes increasingly important. The Second International Conference on Urban Health is convened to bring together scholars and health professionals from various disciplines and areas of the world to address emerging issues in the study of the health of urban populations.

This conference follows The First International Conference on Urban Inner City Health held in Toronto, Canada on October 3-6, 2002, which emphasized the health of disadvantaged inner-city populations. The Second International Conference on Urban Health will broaden this focus and consider urban health as an emergent, multi-disciplinary area of study.

The Second International Conference on Urban Health coincides with the formation of the International Society for Urban Health (ISUH), whose goal is to facilitate the exchange of perspectives, research methods, and data on the study of disease in urban areas and the effects of urbanization on health. ISUH will also evaluate and assist with program development to lessen health risks and promote well-being for people in urban areas.

Our hope is that ISUH will encourage research, interventions, and evaluations that lead to healthier cities in the 21st century.
