MONDAY, MAY 1, 2017

Digital regulation of everyday life.

The everyday needs of our future human existence will be shaped by the invention, distribution and commercialization of new forms of machines, buildings, labor opportunities and energy. This conference meets at the intersection of law, business, technology and creative design. We invite industry leaders, university researchers, technologists, entrepreneurs, artists, lawyers and political advocates to join us in a far-ranging discussion.

PANELS INCLUDE:

- The Internet of Future Bodies
- Ubiquity of the Copy: Impact of IP on Architecture and Urban Life
- The Gig Economy: Algorithms and the Communities We Create
- Renewable Energy, Resilience and Innovation

REGISTER NOW: northeastern.edu/law/connected-futures

PRESENTED BY NORTHEASTERN UNIVERSITY SCHOOL OF LAW AND ITS CENTER FOR LAW, INNOVATION AND CREATIVITY (CLIC)
