Northeastern University School of Law’s Center for Law, Innovation and Creativity (CLIC) PRESENTS

FEATURING David Colarusso

A View from Inside the Public Defender’s Office

David Colarusso is an attorney, software engineer and former high school physics teacher originally hired by the Committee for Public Counsel Services (CPCS), the Massachusetts public defender agency, as a staff attorney; he currently serves as its only data scientist. Colarusso is the author of an open source programming language for lawyers, QnA Markup. Additionally, he writes speculative legal fiction and teaches a class on lawyering in the age of smart machines at Suffolk University Law School. Mostly, he likes to build things: furniture, software, reasoned arguments.
