Introduction

The Graduating Senior Employment survey is designed to obtain information from graduating seniors regarding their post-graduation plans. Graduating full-time undergraduate students are asked various questions related to employment and graduate school. Currently in its eleventh year, this survey provides insight regarding the initial plans of recent graduates. Trend data from the survey is useful in examining patterns of employment and graduate school plans of new graduates.

This survey, as in most previous years (2006 exception), used paper questionnaires that were completed at the time of commencement ticket pickup. Of approximately 2,186 full-time graduating seniors, 1,855 completed the survey yielding an estimated response rate of 85%.

Summary of Findings

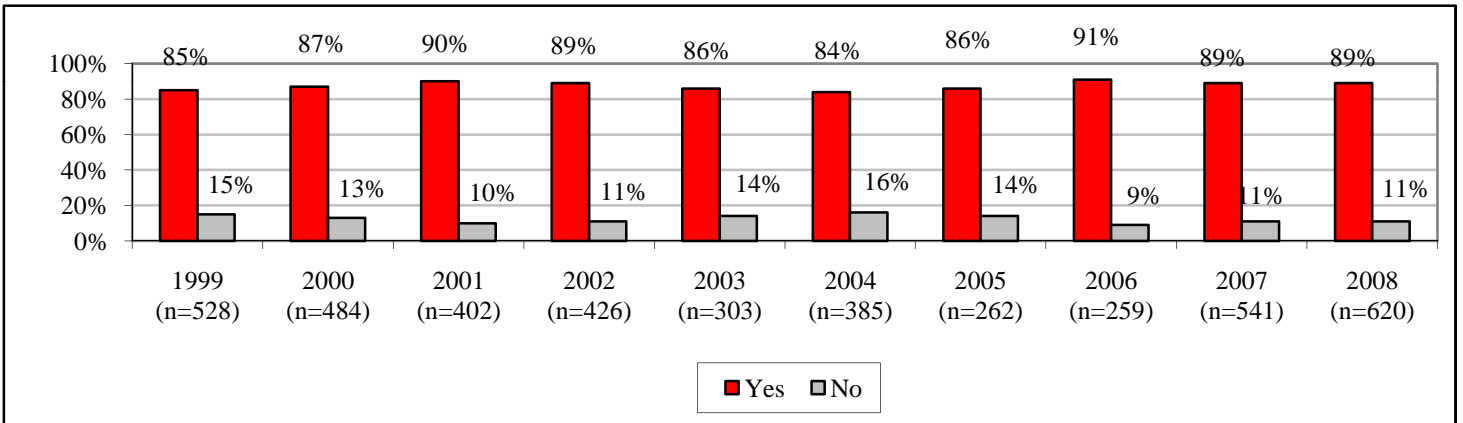

- Thirty-four percent (34%) of graduates report having secured full-time employment at or before their graduation. This figure represents an increase from last year's data (32%).
- Eighty-nine percent (89%) of students who have secured full-time employment indicate that this job is related to their field of study. This is the same percentage as last year.
- Fifty-seven percent (57%) of students who have secured a full-time job (and participated in Co-op) indicate that their job is with a former Co-op employer. This percent is the highest when compared to the previous five years.
- The mean starting salary for those 2008 graduates employed full-time is \$53,180 and the median is \$53,000. The mean represents a 2.2% increase over starting salaries obtained by the graduates in the Class of 2007.
- Among those students who participated in Co-op, 56% reported having received at least one full-time job offer from a former Co-op employer. This percentage is the highest reported since the year 2000.
