Contact Information for Recently Admitted Students

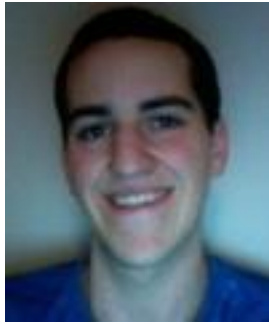

Please feel free to reach out to any of our psychology department undergrad mentors, they will be happy to answer any questions you may have.

Melanie Arenson

mbarenson@gmail.com

I am a sophomore Psychology major with a focus on clinical psychology. I am currently enrolled in the co-op class & thinking about doing a co-op in a residential facility or an office to gain experience in clinical psychology. In addition to my psych studies, I am also a Political Science and Business minor, an RA, a tour guide, & the secretary of the PsyClub. Please e-mail me with any questions you have about your upcoming year, psych, or college in general!

Ryan M Schachne

Sahachne.r@husky.neu.edu

I am a fourth year psychology major with a criminal justice minor. I am extremely interested in forensic psychology and how psychology and law overlap in general. During my time at Northeastern I have cooped at Massachusetts General Hospital doing research with Tourette's Syndrome and Obsessive Compulsive Disorder, as well as working at an injury settlement law firm. Please feel free to contact me with any questions you may have!

Meredith Cohen

meredithc124@gmail.com

I'm a graduating senior who completed 2 minors (sociology and business administration) as well as 2 co-op experiences. I'm most interested in how people think about one another, as well as how psychology can be applied practically--specifically, the application of psychology to the business world. My co-ops have been related to my interests in business--one was a customer service/marketing position, and one was at a consulting firm that practiced industrial/organizational psychology. I have also worked for the past year in the Categorization and Reasoning Lab on campus, first as a directed study student and now for my honors senior thesis project. My project aims to understand how children and adults think about people in different social categories. I hope to one day attend business school for my MBA, but hope to still be able to use my psychology degree in whatever field I end up joining.

Ned Gold

golden223@gmail.com

I am a middler here at Northeastern. I just completed first coop, which I spent working as a research assistant on a genetic study of Tourette Syndrome and Obsessive Compulsive Disorder at Massachusetts General Hospital. I'm most interested in Clinical Psychology, or more specifically, psychotherapy. I'm contemplating medical school and have taken a bunch of science classes. Feel free to ask me anything!
