Federal Funding:  FY2017 Budget

Congress has passed the Federal FY2017 budget. Recent negotiations paved the way for passage of the $1.16 trillion omnibus spending bill, which includes a 6.2% increase to NIH; funding for NSF is flat; there is a modest increase for DOE; DOD’s budget includes increases for R&D.

The federal budget will also provide increased funding across federal agencies for cybersecurity.

Under the continuing resolution, existing non-competing continuation awards are funded at 10% below the committed level; if FY17 appropriations permit, NIH will adjust these awards upwards.

Risk Tip:  Register Your Travel Plans

Northeastern offers a range of support services through WorldAware Solutions for international and domestic travel – from safe trip guidance to incident response and assistance while traveling. For more information see http://www.northeastern.edu/international-travel/travel-support-services/

To register your itinerary: Log on to https://myneu.neu.edu > click Services and Links > scroll down to “My Travel Plans” to enter your information.

Registration is required for university-related international travel by students, staff and faculty leading student trips. Travel support services are also available for student, staff and faculty personal travel. The NUPD International Security Office and Office of Risk Services encourage all to enter and track your itineraries for personal, study, co-op, research and other University travel so that the Northeastern University can assist you in the event that help is needed.

Announcements

NIH Salary Cap:  Under the Consolidated Appropriations Act (2016) the salary cap on DHHS awards increased to $187,000 effective January 8, 2017 and can be charged on active awards. Once the FY17 budget is passed, NIH will provide updated guidance. See NOT-OD-17-049.

Hot Topic: Research and Sponsored Programs Compliance:

**Participant Support Costs**

Costs for individuals participating in research and sponsored programs may be allowable charges to an award.

**Incentives** for participating in human subject research studies are more commonly referred to as study subject payments or research participant incentives and are costs (cash or in-kind, e.g., gift cards) related to participating in research or other sponsored activities. For NSF proposals, Incentives are considered Other Direct Costs on the NSF budget form.

**Participant support costs** include stipends, allowances and fees paid on behalf of or directly to an individual participating in sponsored training or conference programs. NSF REU student stipends are considered Participant Support Costs and should be included on that line item in the NSF budget.

**MTDC and F&A:** Study subject payments are included in the proposal budget modified total direct costs base; participant support costs are excluded from the base and, accordingly, no F&A is charged on those participant support costs. NSF requires that Participant Support Costs remain segregated. Accounts Payable has a special DPAY form for payments and Research Finance uses the following **Banner subcodes:**

- 78010 Student Subject Payments/Incentives
- 74600 Participant Support Costs – Stipends
- 74601 Participant Support Costs – Other

For more information about Study Subject Incentives or Participant Support Costs, please see the [ORAF FAQ's website](http://www.oraf.com/faq's).
