Section III - Hazards Identification

Overview: Toxic by inhalation absorption or ingestion. Can not be made nontoxic. Methanol is a cumulative poison and
death has been reported for ingestion of less than 30 milliliters. Causes CNS depression, headache, intoxication,
dilation of the pupils, convulsions nausea, and dizziness. Unconsciousness and death may result. Methanol
intoxication may produce visual disturbances and blindness.

Safety Ratings

</tbody>
</table>

Recommended safety equipment: safety goggles, lab coat and proper gloves
Storage: Room Temperature away from sources of ignition.

NFPA Ratings

Health = 2   Flammability = 4   Reactivity = 1

Potential Health Effects

The toxicology of this compound have not been completely examined. It is presumed that the toxicity of this item is
similar to other aliphatic alcohols.

Inhalation: Alcohols are absorbed through the mucous membranes and will produce irritation as well as the same
effects as ingestion.

Ingestion: Inhalation will produce CNS disturbance, dizziness, photophobia, headache, stupor, coma and death.

Skin contact: Alcohols are absorbed through the skin. Repeated contact causes defatting of the skin with resultant
irritation and flaking.

Eye contact: May be irritating

Chronic Exposure: Unknown

Aggravation of preexisting conditions: Impaired kidney and liver function may be aggravated by exposure to alcohols.
Preexisting eye, skin, and respiratory conditions may also be aggravated. Methanol has shown genetic toxicity in some
animals.
Section IV - First Aid Measures

**Inhalation:** Remove from source of exposure and get medical attention for any breathing difficulty.

**Ingestion:** Do not induce vomiting if patient is unconscious or extremely drowsy. Otherwise administer 2 glasses of water and induce vomiting. Get immediate medical attention even if symptoms improve.

**Skin Contact:** In case of skin contact, remove contaminated clothing and flush with water. Wash affected area with soap and water. Get medical advice if irritation develops.

**Eye Contact:** In case of eye contact, flush with water for at least 15 minutes and get medical attention.

Section V - Fire Fighting Measures

**Flash point:** 15°C (59°F) TCC

**Flammable Limits (for ethanol):** LEL 3% UEL 19%

**Explosion:** Not Normally an explosion hazards.

**Fire Extinguishing Media:** Alcohol type foam, carbon dioxide or dry chemical. Water is ineffective against alcohol fires but may be used to cool adjacent containers.

**Special information:** Pyrolysis will release toxic oxides such as carbon monoxide.

Section VI - Accidental Release Measures

Remove all sources of ignition, absorb with a suitable absorbent (such as paper towels) and dispose. The preferred disposal method is incineration. Many localities restrict the amount of alcohol that may be flushed down the drain. Insure compliance with all government regulations.

Section VII - Handling and Storage

Store in a closed container, away from open flames or other sources of ignition.

Section VIII - Exposure Control/Personal Protection

**Airborne Exposure Limits:** See section II

**Ventilation System:** Usually not required. When required, Refer to the ACGIH document, “Industrial Ventilation, a Manual of Recommended Practices” for details about ventilation.

**Personal Respirator:** Usually not required. In case of emergency, or when exposure levels are unknown, use a positive pressure, full face piece, air supplied respirator.

**Skin protection:** Protective gloves are not required but recommended as part of good laboratory practice.

**Eye Protection:** Laboratory safety goggles or similar products are not required but recommended as part of good laboratory practice.

Section IX - Physical and Chemical Properties

**Boiling Point:** 172°C  
**Density:** 0.787 g/ml

**Vapor pressure (mm Hg):** 40 @ 19°C  
**Evaporation Rate (Ethanol = 1):** 1

**Vapor Density (air = 1):** 0.6  
**Solubility:** Infinitely miscible with water

**Appearance and Odor:** A clear colorless liquid with the Characteristic odor of alcohol.

Section X - Stability and Reactivity

**Stability:** Freezes at low temperature.

**Hazardous Decomposition Products:** Nothing unusual.

**Hazardous polymerization:** Will not occur.

**Incompatibilities:** Oxidizers.

**Conditions to avoid:** heat, flame and sources of ignition.
Section XI Toxicological Information

Chronic consumption of ethanol is believed to be linked to liver disease, cancer and birth defects.

Section XII - Ecological Information

*Environmental Fate:* Biodegradable

*Environmental Toxicity:* None expected

Ethanol evaporates quickly and is not expected to bioaccumulate. The material is removed from the air by dry and liquid adsorption. The half-life for ethanol in the atmosphere is one to ten days.

Section - XIII Disposal

Local governments often restrict the amounts of alcohol that may be flushed down drain. Insure compliance with all government regulation.

Section XIV Transportation Information

DOT Shipping name: Ethyl alcohol solution
Hazard Class: 3
Packaging Group II
DOT Hazard Label: Flammable liquid
DOT Identification Number: UN1170

Bottles smaller than 32 Fl. Oz. are eligible to be shipped under ORM-D or limited quantity exemptions [49 CFR section 173.150(b)(2) and 173.150(C)].
