

## Program Overview Flyer: Talking points for gaining management acceptance

### Building Safety for Everyone Program Overview

#### Overview of the program design:

- Safety recognition and communication program that provides regular performance feedback to workers, and rewards high level performance.
- Regularly scheduled worksite safety assessment data is used to determine site safety performance.

#### Benefits to participation:

- Opportunity to implement an innovative worksite safety program
- Improve on-site safety communications and feedback structures
- Help improve worker safety, and site safety culture
- Recognize foreman and workers for their role in maintaining a working environment with fewer hazards
- No disruption of current safety process.

#### Integrating the program onto your worksite:

- The Building Safety for Everyone program manager will utilize new worker safety orientations to introduce the program.
- Safety assessment data recorded into a safety management software are used to determine worksite safety performance scores.
- An on-site poster tracks safety performance, and provide workers with feedback on whole site and subcontractor-specific scores.
- Foremen are provided detailed reports from weekly safety assessments, and are encouraged to share this information with their workers.
