

Graduate Student Government – Northeastern University

Name: **Rahul Gollapalli Ranganatha**

Committee: Academic Affairs

I'm grateful for this opportunity to be a part of the Graduate Student Government as Senator for the Academic Affairs Committee. Following were my roles and responsibilities

TA Offerings:

- The task was to understand the problems students faced in all 9 colleges at Northeastern University for TA position offerings.
- I could interact with many other college students and get to know the problems they faced. Collect raw data, and understand the structure each college follows when it comes to offering TA Positions.
- I could submit a brief summary report to Jay Patel for 5 colleges including (Khoury College of Computer Science, College of Science, College of Engineering, College of Professional Studies and, Bouve College of Health Science).

Fall Brunch:

- Took the initiative to be a part the of Fall Brunch Committee from the starting day of the discussions where senators were also involved.
- Was actively involved in preparing quiz questions for topics, printing volunteer cards from reprographics, managing crowds, food service, cleaning, and logistics.

Course Registration:

- During spring semester course registration, many students faced many technical issues while registering for their planned courses.
- Jay Patel asked me to collect all the issues students faced during registration and pass them over to GSG academic affairs mail officially so that further plans of action can be followed by the committee.

Resume 101 Workshop

- Coordinated with the Marketing team for creating promotional posts to be shared on social media and GSG members mailing list.

I was also helping Mahalakshmi and her team for managing other events organized by GSG.

My Primary goal would be to increase diversity and inclusivity among all the colleges in the university. Would like to listen to and obtain feedback from graduate students and try to plan and come up with projects which help graduate students.
