“Los Huskies” Leadership Program

The LSCC will host a series of workshops specifically designed for students interested in leadership opportunities throughout campus. “Los Huskies” Leadership Program will assist students in developing practical leadership skills in addition to giving them a space to freely exchange ideas while learning from each other’s unique perspectives.

The program is broken up into 3 stages and will be offered once per semester. Workshops will focus on a student’s personal and professional development and their sense of community awareness on campus, and transform them into confident leaders.

After the leadership programming, students will be matched with a mentor according to their interest. Each student will be partnered with a LSCC/LaCLA alumni or community partner in the corporate or nonprofit world. As a result, they will meet at least once a month with their mentor virtually or in-person. The LSCC will spearhead group outings to attend cultural and/or community events throughout the Boston area.
