Scrutinizing Surveillance: Discussions in Technology and Justice

How do innovations in surveillance technology impact marginalized communities?

Are the risks involved in the implementation of COVID-related contact tracing apps worth the reward?

How does big data impact policing strategies on campuses and in the community?

Join CLIC for a series of expert-driven conversations about the future of surveillance technology. Hear from Northeastern Law graduates and faculty, as well as industry experts and community organizers working across the country in policy, technology, academia, and more. Each discussion invites the audience to pose questions that address the question: What can be done to ensure that technology doesn’t perpetuate systems of discrimination and injustice?

COVID, Contract Tracing Apps and Public Health

TUESDAY, JULY 28, 2020
NOON to 1:30 PM on ZOOM
