

Distinguished Seminar

Talk with Dr Steven Gray

Dr. Steven Gray Qualcomm

Join us for a discussion about product development, graduate school, diversity in the industry and more with NU PhD Alum, SVP of Engineering at Qualcomm, and Internet of Things (IoT) leader, Dr. Steven Gray.

Dr. Steven D. Gray is SVP of Engineering leading Qualcomm's engineering for the Internet of Everything (IoE) and Automotive businesses. Prior to that, he was the CTO and SVP of Engineering at CSR where he led innovation and product development for CSR's entire portfolio of products including hardware, embedded software and data center solutions. A key initiative Dr. Gray led is the creation of the Internet of Things (IoT) solution combining silicon, software and services allowing CSR to create competitive differentiation. Prior to joining CSR in November 2011, he was Vice President for Huawei Technologies where he led teams architecting the next generation content-oriented networks, media-oriented collaboration tools for next generation telepresence and a IT cloud services platform. Prior to that, he held positions with Marvell Semiconductor, Intel and Nokia.

**Wednesday
February 20,
2019**
