How can I begin integrating oral health education into my curriculum?
Test Your Oral Health Knowledge

1. What is the most common chronic disease of childhood?
   a. Asthma
   b. Seasonal allergies
   c. Dental Caries

2. What condition is associated with periodontal disease?
   a. Sinusitis
   b. Preterm labor
   c. Hypothyroidism
Test Your Oral Health Knowledge

3. What can a primary care clinician do to promote oral health?
   a. Prescribe oral fluoride supplements to all patients
   b. Apply fluoride varnish to the teeth of all adults
   c. Collaborate with dental and other health professionals
   d. Apply dental sealants

4. If a pregnant woman asks you guidance regarding receiving dental treatment during pregnancy...
   a. You tell her to avoid all dental treatment until after the baby is born.
   b. You tell you to avoid dental treatment until the third trimester.
   c. You tell her that dental treatment is safe during any trimester.
Learning Outcomes

- Apply various tools from an interprofessional education model for integrating oral health education across interdisciplinary health sciences curricula.

- Utilize the *Smiles for Life: A National Oral Health Curriculum* as a mechanism for teaching allied health students about oral health.

Smiles for Life Oral Health Curriculum

Smiles for Life is the nation’s only comprehensive oral health curriculum. Developed by the Society of Teachers of Family Medicine Group on Oral Health and now in its third edition, this curriculum is designed to enhance the role of primary care clinicians in the promotion of oral health for all age groups through the development and dissemination of high-quality educational resources.

For Individual Clinicians

We’ve made it easy for individual physicians, physician assistants, nurse practitioners, students, and other clinicians to access the curriculum and learn on their own time and at their own pace. Each of the courses is available online. Free CME credit is available.

For Educators

The curriculum is available in a presentation format easily implemented in an academic setting. Included is a comprehensive set of educational objectives based on the Accreditation Council for Graduate Medical Education (ACGME) competencies, test questions, resources for further learning, oral health web links, an implementation guide, and detailed outlines of the modules.
