We built trails, benches, and fences in the Indian Creek section of Bears Ears National Monument. Our work will give future visitors a more pleasant and fun experience, and minimize their impact on the land by keeping them in designated areas.

• Learned about the challenges of land management and importance of balancing needs
  • Historic, cultural, environmental, and archaeological preservation
  • Commercial and recreational use
• Visited ancient cliff dwellings and petroglyphs and learned how to interact respectfully
• Talked to the Rural Utah Project about their work in increasing Navajo representation in government

Acknowledgements: many thanks to Dr. Karas, our URep; to Mika, Dr. Iacono; to Britt and the other staff of Friends of Cedar Mesa; to the staff of the BLM; to Tara and Madeline from the Rural Utah Project; to our wonderful team members; and to the Scholars program!
